PUSAPATI VENKATA PRAVEEN KUMAR

AI Systems Engineer | Full Stack Developer

+917013230194 pvpk06@gmail.com pvpk.tech github.com/pvpk06 Bangalore, India

SUMMARY

AI Systems Engineer with ~2 years of experience building **scalable full-stack applications and intelligent real-time systems**.
Proven ability to design and deploy **end-to-end AI systems integrating ML models, and automation workflows**. Handled production workflows impacting enterprise-scale operations with strict reliability requirements.
Currently working at TCS on enterprise systems, focusing on **automation, monitoring, and production reliability**.

WORK EXPERIENCE

Tata Consultancy Services **(July 2025 – Present)**
Systems Engineer (Digital)

- Supported production-critical enterprise systems for AVIVA UK, ensuring high availability of scheduled workflows
- Built automated reporting dashboards, reducing manual monitoring effort by ~40%
- Developed internal tools/scripts to streamline system monitoring and failure recovery workflows
- Improved operational visibility by designing data-driven reporting pipelines

RamanaSoft Consulting Services **(Mar 2024 –Mar 2025)**
Full Stack Developer (MERN Stack)

- Engineered **2 large-scale internal web applications** using React, Express, and SQL
- Designed and implemented **RESTful APIs**, improving data processing efficiency and system integration
- Optimized SQL queries, reducing response time and improving application performance
- Delivered **end-to-end features** across development, debugging, and production deployment.

RECENT PROJECTS

Project ArthaMind **(Self Project)**
AI Trading System

- Architected an end-to-end AI trading system integrating market data, technical indicators, and LLM-based decision logic.
- Integrated Zerodha Kite API for real-time market data and simulated order execution.
- Built an intelligent stock ranking engine using scoring algorithms across multiple indicators (RSI, EMA, MACD).
- Designed modular multi-agent architecture for scalable AI decision systems
- Enabled real-time scanning and ranking of stocks to identify high-probability trading opportunities.

Project ElevateResume **(Freelanced)**
AI Powered Resume Builder

- Engineered a full-stack AI-powered resume builder using React, Express, and SQL.
- Integrated LLM-based content generation for role-specific resume optimization.
- Generated role-specific resumes using LLMs, improving ATS alignment and reducing manual effort by ~50%.
- Handled dynamic content generation and editing workflows for multiple resume formats.

INTERNSHIPS & CERTIFICATIONS

Data Science & AI Internship (RamanaSoft) **(Feb – Mar 2024)**

- Built ML pipelines for classification and regression using Python and scikit-learn.
- Worked with data preprocessing, feature engineering, and model evaluation metrics.

EDUCATION

SRGEC Engineering College **(2020-2024)**

B. Tech Computer Science and Engineering — CGPA: 7.9/10

SKILLS

PROGRAMMING	: Python, JavaScript, SQL, CPP
Frontend	: React.js
Backend	: FastAPI, Express.js, Flask
Databases	: MySQL, SQLite
AI/ML	: TensorFlow, Keras, LangChain, LLM APIs (OpenAI, Ollama)
Systems	: REST APIs, Data Pipelines, Real-Time Processing
Tools	: Git, OpenAI API, Ollama, VS Code, Google Colab

KEY ACHIEVEMENTS

GATE 2024
Secured AIR **15,643** in GATE 2024 CS**.**

TCS AI Friday Hackathon
Earned Runner-Up position in TCS AI Friday Hackathon by building an AI-driven solution in a time-constrained competitive environment.

LeetCode

Solved 200+ problems on LeetCode, strengthening proficiency in data structures, algorithms, and problem-solving.

RESEARCH & PUBLICATIONS

Journal of management and entrepreneurship (Research Paper)

UGC JOURNAL **(01 Mar 2024)**

A Multimodal Gesture and Speech Recognition System for Motor Disabilities and Enthusiasts: Accessible HCI.

Designed multimodal system combining speech and gesture recognition for accessible HCI applications

INTERESTS

- Designing and experimenting with AI-driven systems and real-world applications.
- Investing in Stocks by analyzing trading strategies.
- Exploring startups, product design, and emerging technologies.
- Solving complex algorithmic problems and optimizing solutions.
